PROFESSIONAL SUMMARY

Information Systems & Technology graduate with experience supporting healthcare operations, business systems, technical documentation, data management, and end-user support. Skilled in Microsoft 365, Windows environments, troubleshooting, reporting, and process improvement with an interest in Healthcare IT and systems analysis.

Education

Bachelor of Science in Information Systems & Technology (Cybersecurity Concentration)

California State University, San Bernardino | December 2025

Certifications & Training

Google Cybersecurity Certificate | AWS Security Fundamentals

Experience

NEMT Operations Coordinator

Mission Care Transport, San Bernardino, California

August 2022 - Present

- Provided technical support for healthcare scheduling, dispatch, Microsoft 365, and operational software systems.
- Performed data migration, file management, data validation, and system maintenance to ensure operational accuracy and reliability.
- Documented workflows, procedures, and technical processes to improve consistency, compliance, and operational efficiency
- Supported end users by resolving software-related issues and maintaining data integrity through data validation, reporting, and record management

Projects

Systems Administration & Network Infrastructure Capstone

- Designed, configured, and troubleshoot a multi-machine network environment supporting business and web application operations
- Configured network connectivity and system communication across multiple virtual and server environments
- Supported deployment of a database-backed e-commerce website within the project environment
- Diagnosed and resolved network and system configuration issues affecting application accessibility and performance
- Documented system configurations, troubleshooting procedures, and technical findings

Incident Response & Cybersecurity Investigation Capstone

- Participated in a simulated incident response engagement involving investigation, containment, and remediation activities.
- Analyzed security events, identified root causes, and documented findings and recommendations.

Technical Skills

Technical Skills: Microsoft 365, Windows 10/11, Windows Server, Linux, Active Directory, TCP/IP, DNS, DHCP, Troubleshooting, End-User Support, Data Validation, Reporting, Technical Documentation, Process Documentation, System Maintenance, Access Control
